2FA

DO YOU KNOW WHAT IS TWO-FACTOR AUTHENTICATION (2FA)?

IN THE PHYSICAL WORLD

WE STAY SAFE BY LOCKING OUR DOOR. WE ALSO LOCK THE GATE AS A SECOND LAYER OF PROTECTION.

IN THE DIGITAL WORLD

WE SAFEGUARD OUR PERSONAL INFORMATION AND MONEY BY USING A STRONG PASSWORD AND 2FA.

2FA uses more than one type of information to identify who you are in order to grant you access to your online account.

SOMETHING YOU KNOW (PASSWORD)

WITH →

SOMETHING YOU HAVE (ONE-TIME PASSWORD (OTP) FROM A 2FA TOKEN)

OR

SOMETHING YOU ARE (BIOMETRICS E.G. FINGERPRINT, FACIAL RECOGNITION)

A second layer of security ensures that even if the bad guys obtain your password, your account is still protected if they are unable to get hold of a second factor.
